CAREER SUMMARY:

Experienced software developer specializing in PHP and Node.js, proficient in building scalable web applications and APIs. Strong background in DevOps, employing CI/CD pipelines, Docker, Nomad, and cloud platforms to optimize development workflows and application performance. Skilled in collaborating across teams to deliver high-quality solutions, continuously adapting to new technologies to drive innovation and efficiency.

WORK EXPERIENCE:

Triophase Global Services Private Limited

Software Developer | April, 2023 - Present

- Implemented CI/CD pipelines to automate deployment for Wordpress, PHP Laravel and Node.js applications.
- Utilize Docker for containerization and orchestration with HashiCorp Nomad and Consul for scalable and consistent infrastructure management.
- Monitor application performance with tools like Prometheus, Grafana optimizing applications and platform efficiency.

Omind Technologies Pvt Ltd.

Sr. PHP developer | March, 2022 - March, 2023

- Developed scalable web applications using PHP, CodeIgniter, JavaScript, MySQL, HTML, CSS, and Bootstrap.
- Optimize MySQL database performance through indexing and normalization techniques for enhanced application responsiveness.
- Collaborate with UX/UI designers to design and implement frontend interfaces using HTML, CSS, and Bootstrap, ensuring user-centric design principles are met.

Fastinfo leagal services Pvt Ltd

PHP Developer | October, 2021 - March, 2022

- Writing and maintaining server-side code, integrating with databases, and developing APIs.
- Fixing bugs, optimizing performance, and refactoring code for efficiency.

Uaguria software Pvt Ltd

Web Developer | December, 2020 - October, 2021

- Assists in building and maintaining websites, working on both front-end and back-end tasks under the guidance of senior developers.
- Learns and applies coding languages, troubleshoots issues, and contributes to the overall functionality and design of web projects.

RELEVANT PROJECTS:

Triophase Global Services Private Limited

- Designed and developed platform and backend applications for our client, Convesio, a well-known hosting service provider.
- Performed DevOps operations and worked with various orchestration tools like Nomad and Kubernetes.
- Created containerized applications using Docker and worked with various open-source products and projects like Envoy Proxy, Nginx, and SSH.

- Configured server networking and deployed applications by writing Docker Compose files.

Omind Technologies Pvt Ltd.

- Developed various types of quality management applications for call center operations according to client requirements.
- Worked on Human Resource Management System created with PHP frameworks like CodeIgniter and Laravel.
- Wrote optimized queries using MySQL and ensured applications met client specifications and quality standards.
- As a senior developer worked with team and did code review, and also wrote tests for functional and unit testing.

Fastinfo leagal services Pvt Ltd

- Developed and maintained our organization's own product, Fastinfo Class, a well-known online learning platform.
- Worked on other products like Online Legal India and Online Class India, wrote optimized queries to manage large volumes of data, and created responsive webpages to ensure a good user experience.
- Created custom CRM applications for our organization to manage operations.

Uaguria software Pvt Ltd

- Designed and developed various websites using core PHP and Laravel.
- Developed e-commerce and park management application with admin, user and vendor panel and dashboard.
